CAREER OBJECTIVE

Detail-oriented Information Technology student (BS IT, expected 2027) with hands-on experience in web and Android development, programming, and database management. Seeking an entry-level role to apply technical skills and contribute to a team, bringing analytical and problem-solving strengths from managing a family-owned store and completing academic projects.

KEY SKILLS AND COMPETENCIES

Web Development (Front-end)

- Building and deploying responsive websites and web applications
- Version control and teamwork using Git and GitHub

Mobile Development (Android)

- Android apps with Java, XML, Android Studio, and SQLite
- Interface design with Material Design 3

Programming and Database Management

- Programming in Python, Java, C, and C#
- Managing data with SQL, MongoDB, and SQL Server Management Studio

Customer Service and Business Operations

- Handling customer concerns and maintaining client relationships
- Supplier coordination, inventory tracking, and daily operations

Administrative and Organizational Skills

- Data entry, documentation, and record-keeping
- Time management, multitasking, and basic SAP operations

RELEVANT EXPERIENCE
